

Weather Report

The dominant ice situation in the Baltic Sea is meanwhile also present in the news. It is reported that around the Baltic Sea a large number of ships is stuck in the ice.

Especially the regions around the Gulf of Bothnia are concerned. The entire Finnish coast is covered with ice. However, due to northeastern winds the ice is pushed further against the Swedish east coast and piles up in hummocks up to 6 meters.

The Gävle Container Terminal closed operations yesterday as the navigation to the port was stopped due to security reasons. Three container vessels are stuck in the ice and waiting for ice breaker assistance. Though at least 4 ice breakers are in service, the situation is severe that also those get stuck and cannot cope with the many vessels needing support.

Accordingly, the backlog of operations might easily follow in a congestion situation at the terminal in Gävle.

Please note that following vessels are or are expected to be affected:

- M/V Pantonio discharged all Sweden-bound cargo including Gävle containers in Stockholm ETA 04/03
- M/V Elisabeth is scheduled for Gävle ETA 09/03
→ Gävle call has to be evaluated according to the development of the ice situation
- M/V Pengalia is scheduled for Gävle ETA 12/03
→ Gävle call has to be evaluated according to the development of the ice situation

Due to the hard winter conditions please take into account that vessels can be delayed or rotations need to be adjusted. Nevertheless, please be reassured that Team Lines will do its utmost to offer a reliable service.
