

Weather Report

Dear Customers,

currently the ice situation in the Baltic Sea and surrounding water areas remains rather stable. Strong and heavy winds are expected for the next two to three days which means no easing of the tension. We would like to draw your attention to the following service areas which are still concerned:

Sweden

The Gulf of Bothnia still nearly complete covered with ice and streaks of open water are in danger of being closed again at winds turn. Regions around Gävle and Stockholm still fighting under the ice situation. Ice breakers suffering under engine break downs due to continuous operations.

Finland and Russia

The entrance to the Finnish ports is covered with fast ice thicknesses. For the fairway heading towards St. Petersburg we have similar conditions with additional hummocks hindering the passage towards the port. The port of St. Petersburg is still strongly recommended to be entered in convoys. Accordingly, longer transit times for vessels and waiting times for berthing are expected that can last up to several days.

Baltic States

Above all, the Bay of Riga is affected with the fast proceeding build-up of hummocks especially in the northern bay and ice thicknesses up to 30 cm. Though the fairways towards to port of Riga are secured by ice breakers, longer transit times have to be expected here, too.

Poland

The port of Szczecin is still strongly recommended to be entered in convoys.

Due to the hard winter conditions please take into account that vessels can be delayed or rotations need to be adjusted. Nevertheless, please be reassured that Team Lines will do its utmost to offer a reliable service.

However, the above mentioned circumstances demand that Team Lines has to reserve all its rights under the contract of carriage.
